Notes

1. This compatibility matrix identifies the combinations of CYBEX infant car seat Cloud S and the CYBEX strollers that have been tested and approved by CYBEX for use as part of the CYBEX Travel System. Combinations not listed in this matrix have not been approved by CYBEX for this purpose and must not be used.
2. The use of non-approved product combinations may create safety risks, including insecure attachment or unintended detachment of the infant car seat. CYBEX does not assume responsibility for verifying the compatibility or safety of combinations involving stroller models not listed in this compatibility matrix. For information regarding compatibility with stroller from other manufactures, please contact the respective stroller manufactures directly.
3. Compatibility may vary depending on the stroller model, model year, product generation, and adapter version. Always verify the approved combination using the latest version of the compatibility matrix, which is regularly updated to reflect the current compatibility status. If you are unsure about the compatibility of your products, please contact CYBEX Customer Service before use.
